

# APERTO Lucent

Premium image quality and dose performance in an affordable open design

A space saving wide open MRI that provides affordability, positioning versatility and more comfortable patient experiences.

The system's streamlined single-pillar design is perfect for limited space requirements while ensuring exceptional Fujifilm performance and reliability.

Wide open access for patient comfort and positioning flexibility. Advanced automated imaging technologies and shortcuts enhance workflow efficiency and optimize image quality.

## Product Highlights

- Fast, comfortable and affordable MRI
- 0.4T permanent magnet provides high performance for tight spaces and budgets
- Patient comforting 320° patient view single pillar design
- Lateral table shift simplifies precise positioning, workflow and comfort
- RADAR motion compensation
- RF FatSat to (fat saturation signal suppression)
- Siting and installation are fast and easy, and the system weighs less than typical systems
