

SCENARIO View *FOCUS Edition* with **Cardio StillShot**

A revolution in temporal resolution

Scenaria View with available Cardio StillShot Motion Correction option employs 64 discrete detector/electronics channels over 40 mm detector coverage for rapid true 64 slice thin-slice imaging and reconstructs up to 128-slices per scan rotation.

Scenaria View features a unique lateral shift table with ± 10 cm shift range and Fujifilm's advanced iterative reconstruction, Intelli IPV for dose reduction with exceptional low contrast resolution.

Product Highlights

The Focus Edition is a powerful premium performance CT solution providing high image quality and dependable routine application capabilities with advanced clinical application options available for:

- Maximum high speed scanning 0.35 sec.
- Enhanced Cardiac CTA
- Interventional Needle Guidance
- Dual Energy Scanning
- Shuttle Scan for brain perfusion exams
- Remote diagnostic maintenance
- Cardio StillShot intelligent motion correction coronary imaging
- Integrated Synapse 3D post processing
